

HYDRAULIEK 24

maakt het makkelijk

MORE POWER, LESS ENERGY!

Technical Specifications:

- 39Kw Maximum Peak Power
- 33Kw S4 Power (60 sec)
- 22Kw S1 (Continuous)
- Operating Voltage: 380-480VAC / 575-800VDC
- Perfect for integration with battery-powered systems
- Easy adjustment of maximum pressure, flow and power
- Suitable for the electrification of existing combustion engine machines
- Plug-and-Play ready
- Ultra-responsive servo motor
- Smart energy-saving modes (RPM & pressure adjusts automatically based on power demand)
- Increased efficiency of your hydraulic power system
- Suitable efficiency of your hydraulic power system
- Suitable for any 3-phase electric power generator

The displayed installation is just an example of the possible configurations.

E-MOTION PACK

39KW
160 L/MIN
